

## GPS Events & Activities - Winter 2021

---

### Online Study Sessions

Regular online study sessions for students to come together, discuss their work, and help each other. The idea is simple: We start with a char and establish goals for the session, then – applying the pomodoro technique – we work silently in 30-minute blocks with short breaks where we can chat/discuss things. We will send a reminder each Thursday on [Facebook](#).

Date - Weekly on Thursday\*

Time & Location - 12:00pm\* using [Google Meet](#)

\*Subject to change. Announcements will be made via [email](#) and [Facebook](#).

### Meet & Greet Seminars

The GPS will be hosting “meet & greet” seminars for new and returning students alike. In these seminars, we will ask that students give short (5-10 minute) seminars about themselves and their research. We hope this helps people get to know each other and acquaint themselves with research in our department.

If you'd like to present your work in one of these seminars, please fill out this [form](#).

Date - Friday, February 12th

Time & Location - 3:00 pm (NST) using [Google Meet](#)

More to come!
